LEONARDO

Leonardo is an open-source initiative dedicated to empowering education and accelerating research.

Build 2026-02-25-r136

Load the protein structure here. Small-molecule import and preparation remain available from the workflow launcher.

Structure: No structure loaded.

Open Structure... | Fetch Structure...

Structure: No structure loaded
Ligand: No ligand selected
Ligand picking, interaction calculation, filters, redraw actions, and export now live in 'Interaction Controls...'.

Interaction Controls...

Workflow Launcher

Open focused workflow panels for structure preparation, docking, simulation, and analysis.

- Protein Modeling...
- AlphaFold / ColabFold...
- Sequence Bioinformatics...
- Psi4 Quantum...
- Ligand Source Prep...
- Pocket Docking...
- Redocking...
- Virtual Screening...
- Trajectory Tools...
