Module-level workflow features and verification evidence
Filled circle = present
Leonardo module
Structure acquisition
Sequence bioinformatics
Protein modelling and mutation
Interaction analysis
Ligand source and parametrization
Pocket docking
Redocking
Virtual screening
OpenMM dynamics
Trajectory and interaction analysis
Guided-exit diagnostic
MOPAC capped-cluster reaction
Psi4 quantum
AlphaFold workflows
Task monitor and reports
Object/state tracking
QC and guardrails
Sampling / batch logic
Reports and plots
Automated tests
Smoke/case workflow
Manuscript asset
Feature or evidence category
